

Category	Description
<b>Immediate (I)</b>	Victim has life-threatening injuries (airway, bleeding, or shock) that demand immediate attention to save the person's life.
<b>Delayed (D)</b>	Injuries don't jeopardize the victim's life. The victim may need care, but it can be delayed while triaging other victims.
<b>Minor (M)</b>	Victim has insignificant injury (e.g., minor abrasion on a knee). The victim may need minor care, and might also assist rescuers in helping others with more serious injuries.
<b>Dead</b>	Not breathing after two attempts to open the airway. There isn't time or resources to do CPR if others need immediate help.
